

POWERING KNOWLEDGE AND INNOVATION

Research Spending and Results is a service to fully disclose research grant award data in compliance with the Federal Funding Accountability and Transparency Act of 2006.

Powering Knowledge and Innovation

The Act requires federal agencies to make information accessible and searchable by the public for free, including the following for each federal award*:

- The legal name of the entity receiving the award
- The award date, description, and identifier
- Total funds obligated to date
- Information on the award including transaction type, funding agency, program source, etc
- The location of the entity receiving the award including Congressional District
- A unique identifier of the entity receiving the award

In addition to information required by the Transparency Act, Research Spending and Results includes the following information for each federal award:

- Award Abstract
- Publication Citation (NSF only)
- Project Director/Principal Investigator
- Award Start and End Date

This search capability provides transparency about how research grant dollars are being spent and what results are being achieved. Research Spending and Results currently makes grant award information searchable for the National Aeronautics and Space Administration (NASA) and the National Science Foundation (NSF). In addition, users can now search specifically for NSF awards funded by the American Recovery and Reinvestment Act.

Research Spending and Results data is updated daily for NSF and monthly for NASA.

Research Spending and Results displays information for grant awards from NSF that are active in FY1994 and beyond and have total obligations to date of \$25,000 or greater and NASA grant awards that are active from FY2007 and beyond. It does not provide award information for loans or contracts.

Research Spending and Results lets you search for and find Recovery Act Awards made by NSF!

* Please note that information for Congressional District and Doing Business As Name may not be included for some NASA awards.
